

PUBLIC HEALTH TRAINING: Methamphetamine

September 30th

10am-11:30am

Zoom

MEET OUR SPEAKER JUSTIN ALVES, RN, ACRN, CARN:

- He is a Clinical Nurse Educator for the State Technical Assistance and Treatment Expansion of Office Based Addiction Treatment (STATE OBAT) at Boston Medical Center, with specific expertise in infectious disease and their co-occurrence with substance use disorders, community outreach, and harm reduction.
- He serves as an expert on the Substance Use Disorder Care Continuum ECHO team, providing opioid addiction training and mentoring to health centers throughout the SUD care spectrum.

Learning Objectives

- Participants will be able to describe the effects of methamphetamine use and the risks for methamphetamine overdose.
- Participants will be able to identify evidence-based treatment strategies for patients experiencing methamphetamine use disorder.
- Participants will be able to identify subpopulations of patients at heightened risk for methamphetamine use.
- Participants will evaluate strategies to de-escalate patients experiencing methamphetamine related psychosis.

Presented by New England High Intensity Drug Trafficking Area in conjunction with Boston Medical Center Office Based Addiction Treatment Training and Technical Assistance.
