

Dear Community Member,

The purpose of this letter is to introduce the Column Health team helping to tackle the addiction epidemic in our communities. We are a growing family of outpatient clinics across New England focused on the treatment of mental illness, substance use disorders, and addiction. We restore hope to individuals and families struggling with these illnesses through our compassionate, technology-enabled, outcomes-focused, coordinated and comprehensive model of care.

This is personal. I founded Column Health when I struggled to find adequate treatment options for a family member who had a substance use disorder. There were no options in our community that were humane, outcomes-driven, and addressed the chronic nature of the disease. It didn't matter how many resources or how much effort we threw at the issue or how many rehab centers we sent her to, we always ended up frustrated because the solution that was needed didn't exist where it was needed most: in our community. As a result of that experience, I focused on designing and building concierge outpatient practices to fill this void in the continuum of care. Column Health is part of my personal journey and our aim is to support our neighbors on theirs.

We offer a range of mental health outpatient services to treat addiction and substance use disorders because we know that people and families have different needs.

If you or someone you know is looking for help, please reach out to us for immediate care or to speak with someone about treatment options.

Call today, be seen today. Same day appointments are available at all of our locations. Walk-Ins welcomed and virtual telehealth visits are always available.

We accept insurance. We work with most insurance plans. Patients with MassHealth Medicaid have \$0 copays.

Our team is friendly and courteous. Our clinics focus on concierge levels of service, with friendly staff to ease the burden and stress of treatment. For folks struggling with these diseases, anything we can do to make their experience better goes to helping make their recovery that much more likely.

Beautiful spaces, convenient locations and welcoming environments. Our clinic locations make entry into treatment as easy as possible. We create welcoming environments and install beautiful, local artwork because it conveys the respect we have for our patients, our providers, and our neighbors. We believe that building well-appointed spaces make coming in for treatment less stressful, less scary, and more likely for patients to experience what we're all about.

We recognize that our success is based on the success of our patients and our community; we make it our mission to help people recover from addiction and to recover their lives. We are located throughout Massachusetts, Connecticut, and New Jersey. For additional information including clinic addresses, please visit www.columnhealth.com.

We look forward to working with you and helping together.

Colin Beatty, Founder and CEO
